INTRODUCTION

Welcome to Grade 9 Music! This course emphasizes the creation and performance of music at a level consistent with previous experience and is aimed at developing technique, sensitivity, and imagination. You will develop musical literacy skills by using the creative and critical analysis processes in composition, performance, and a range of reflective and analytical activities. You will develop an understanding of the conventions and elements of music and of safe practices related to music, and will develop a variety of skills transferable to other areas of their life.

This course is intended to develop in you an understanding and appreciation of music through practical skills and creative work. Through this program you will not only find in music a source of enjoyment and personal satisfaction, but also gain creative problem-solving skills, individual and cooperative work habits, a sense of personal responsibility, connections to their communities and future careers, and knowledge of yourselves, others and God.
